VPS - Volvo Truck's Lean Program

The Volvo group has process improvement as a key objective in all factories and sites. Learn about the advantages and challenges of a large scale Lean initiative.

The Australian truck market is one of the most competitive in the world, with some 26 manufacturers competing for a limited number of trucks. In this kind of environment a local manufacturer needs to use every advantage to stay ahead of the game. Following a global strategy the local factory has (among other things) eliminated racking from the assembly area, moved to a pick trolley system and has a dedicated, on-site Lean training facility.

- On site parking available – Please use the employee carpark and walk down to Reception rather than the visitor car park at Reception.
- No photography
- Enclosed shoes are required
- Maximum number 20 (ops people will be accepted before consultants if the event is oversubscribed)
- Maximum of 2 attendees from any one company - unless space permits
- Volvo reserve the right to approve registrants - we will advise you by email on or before 2nd March if your registration has not been accepted

Please don't contact Volvo for registration or information for this event.
Use the attached registration form, or better still, register online

If you're serious about changing or improving the culture in your business, do not miss this event!
